FLORENCIA INSCRIBING THE BACK
OF A METAL PLATE

The collection features 30 AI-generated artworks, each paired with an original AI-assisted poem, printed on aluminum metal plates (29 x 50 cm)—a nod to traditional manuscript dimensions while symbolizing the fusion of organic Persian miniatures with the inorganic, machine-driven future. Each artwork is also accompanied by a unique animated sequence, where flowers, trees, animals, and objects come to life. The animations can be viewed on OpenSea, with all pieces officially recorded on the blockchain, ensuring authenticity and digital permanence.

On the reverse side of each plate, Brück inscribes a reflective poem, inviting viewers into the deeper philosophical layers of the work. She further personalizes each piece by adding miniature decorative elements and her signature, reinforcing the connection between artist, history, and technology.
